

I am a regular listener to KLOVE radio in San Antonio Texas. They provide a great service to my family by broadcasting encouraging christian music that is both commercial free and family friendly. We especially appreciate the fact that their signal reaches our small town of Boerne 30 miles north west of San Antonio which has no stations of its own. Frequently we tune in to hear what is happening on the local calendar events and have attended several concerts and seminars solely because of this information. I understand that LPFM may jeopardize our ability to listen to such a needed and valuable station, please don't let that happen.
